

Amendment to the Claims

Claim 1 A Therapeutic Vibrating Shoe comprising a wearable soft-bodied fabric shoe.

Claim 2 A semi rigid unit bottom sole with framework, whereby vibration is transmitted throughout the entire bottom of the shoe and therefore to the entire foot.

Claim 3 A vibrator motor incorporated into the sole at the mid-arch of the shoe that produces soothing vibration.

Claim 4 A self contained battery pack, power-source incorporated in the heel of the sole of the shoe that is rechargeable via a port in the rear of the sole that accepts a 3 volt AC adapter.

Claim 5 an on/off power switch incorporated in the heel and available to the outside of the heel on the medial surface.

Claim 6 A self-contained vibrating modality for the soothing treatment of the foot, allowing freedom of movement while soothing treatment ensues, opportunity to use vibrating treatment in remote localities, portability due to lightweight materials and construction.
